EDDERIS VALUES

An obvious observation

It is now more than twenty years since the concept of Sustainability has been used by the Brundtland Commission.

Despite the global awareness and efforts, much remains to be done. We are still at the premise of a fundamental shift in business. Shift necessary for the sustainability of industrial activities.

The two decades that have passed have seen the birth of major initiatives and strong commitments as the United Nation Global Compact and the Global Reporting Initiative. After the time of commitments, it is now essential to put all these concepts into practice.

Climate change is a reality. Environmental damages are now worldwide. And both will follow with unprecedented social impacts.

It is in such a context that challenges, both economic and industrial faced by companies are no longer separable from the Corporate Social Responsibility.

Sustainable development is now a recognized growth factor. This is because it is sustainable and rational, because it considers external factors to its own functioning, that the development of a company will last.

Owner and General Manager.

Our values come together in Sustainable Development and Corporate Social Responsibility

We are involved for the past 10 years in the support of sustainable companies and every associate to Edderis is involved in our commitment to customers

Because we believe that companies evolve with the endowment they are made of, our teams of professionals continuously enrich their skills to the needs of our customers.

We believe that understanding the challenges of our customers and partners allows us to support them in their sustainable development, help to control risk, assess and improve their performance

Partner of companies that move forward

Our goal is to assist companies in their approach to sustainable development by providing knowledge and multidisciplinary expertise with a commitment to our customers through a lasting relationship. The solutions we provide are practical and appropriate, implementing effective and proven methodologies.

It is through an active partnership that we also coach companies in the transition imposed by the new challenges they face.
